**Embodied Environmental Risk in Technical Communication** Samuel Stinson 2022-03-04 This collection calls for improved technical communication for the public through an embodied, situated understanding of environmental risk that promotes social justice. In addition to providing a series of chapters about recent issues on risk communication, this volume offers a diverse look at methodological practices for students, researchers, and practitioners looking to address embodied aspects of crisis and risk that incorporate UX, storytelling, and dynamic text. It includes chapters that bring embodiment to the forefront of risk communication, highlighting the cycle of content creation, dissemination, public response and decision making, continuing iterations of educational efforts, and recovery, toward increasing adaptive capacity as a whole. In addition, this work directs necessary attention to overcoming perceptual difficulties, memory lapses, definitional differences, access issues, and pedagogical problems in the communication of risks to diverse publics. This collection is essential reading for scholars and can be used as a supplemental text or casebook for courses in technical communication, environmental communication, risk and crisis communication, science communication, and public health.
